

HOVMAND HY40

HPV40 is a robust PU machine for polyurethane and polyurea with a capacity of 40 kg/min.

The machine is both easy to operate and maintain and comes with its own power supply in the form of a compressor and a petrol-powered hydraulic pump and generator. It can be mounted on a trailer, in a van or another vehicle depending on the application.

Technical Specifications		23.10.2014
Maximum Output:	Kg/min	40 (low pressure mixing head with static mixing)
Maximum Pressure Rating:	Bar	100
Tanks:	l	2 pcs. 50/90/150/280
Heating Power:	kW	1/1,5
Hose Length:	m	Max. 30
Hose Heating Power:	kW	2
Generator:	kW	5
Compressor:		1,5kW, 100-200 l/min, 8-10 bar
Air Consumption:	l/min	100 - 200
Weight:	kg	approx. 1100
