

# HOVMAND HPV15

HPV15 is a robust PU machine for polyurethane and polyurea with a capacity of 15 kg/min.

The solid construction of the machine, the simple operation and the option of mounting an extended hose set than the 12 meter standard hose set makes the HPV15 very suitable for nearly all possible circumstances.

The special design of the pump unit makes it possible to set the mixing ratio within minutes without the need to interchange any component and make time-consuming calibration. The machine is both easy to operate and maintain.

<b>Technical Specifications</b>		23.10.2014
Maximum Output:	Kg/min	20 (low pressure mixing head with static mixing) 15 (high pressure mixing head)
Maximum Pressure Rating:	Bar	200
Heating Power:	kW	15
Hose Length:	m	18 - 48
Hose Heating Power:	kW	3
Electricity:	V/A	3 x 400/32
Air Consumption:	l/min	400 - 700
Dimensions:	mm	1200 x 700 x 900
Weight:	kg	Approx. 350
